DETAILED ACTION

Claims 1-11 are before the Office.

On February 11, 2009 an Advisory Action was issued requiring a translation of the foreign priority reference JP2003/097593 to perfect the priority claim cited on page 8 of the Applicants' communication of January 12, 2009. The Examiner apologizes for her oversight in not recognizing that the filing date of the application also disqualified the Li reference from being valid prior art.

Accordingly, the requirement for a translation of the priority document is withdrawn and the Li reference is no longer cited against the claims. Therefore the rejection of claims 1-11 under 35 USC 103(a) is withdrawn.

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art teaches and suggests an apparatus for controlling a movable robot comprising a camera, moving means, and a device for outputting a sound, which comprises: a means for recognizing a subject to be followed up, which recognizes the subject on the basis of an image taken by the camera; a means for recognizing a distance to and from the subject having been recognized by the means for recognizing a subject to be followed up; and a means for controlling movement, which controls the moving means so as to keep the distance from the movable robot to the subject, having been recognized by said means for recognizing a distance to the subject to be followed up, at a predetermined distance. However the cited prior art does not teach that with

Art Unit: 3661

these capabilities a movable robot should have a means for controlling the outputting of a sound, which outputs a sound or a voice related to the distance to the subject, wherein the sound or the voice from the means for controlling the outputting of a sound informs the subject about a situation regarding the distance to the subject, so as to notify the subject to keep the distance from said movable robot to the subject at the predetermined distance, and said notifying operation comprises informing the subject whether it needs to stop moving and wait based on an increase in the actual distance, determined based on the predetermined distance, between the movable robot and the subject.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. "Providing the Basis for Human-Robot-Interaction a Multi-modal attention system for a Mobile Robot", Lang, Kleinhagenbrock, Hohenner, Fritsch, Fink and Sagerer, ICMI '03, November 5-7, 2003.
